

PUBLIC INVOLVEMENT MEETING

Village of Ashwaubenon
Morris Avenue Reconstruction
April 13, 2026

Welcome to the public involvement meeting to discuss the improvements along Morris Avenue. The intent of the meeting is to inform you about the proposed improvement and to receive input from you regarding the project. The project is being completed by the Village of Ashwaubenon.

A short presentation will explain and discuss project details and displays. Afterward, representatives from Ayres Associates and the Village of Ashwaubenon will be available to answer questions.

Comment sheets for your written comments and concerns about this project are also available. Please use this to write down your comments, and either deposit them in the comment box or return them to the Village Hall.

1. PROJECT PURPOSE AND NEED

The purpose of the project is to reconstruct Morris Avenue from Holmgren Way to Ashland Avenue. The project will address the deteriorated pavement conditions and failing pipe networks below the roadway. As part of the project, sidewalk installation is being considered depending on feasibility and community input.

2. PROPOSED IMPROVEMENT

The proposed Morris Avenue reconstruction will include the complete removal and excavation of the existing roadway, roadway base replacement, replacement of all pipe networks below the roadway, potential 5-foot-wide concrete sidewalk, and new asphalt surface roadway. The roadway cross section will include an 11-ft wide travel lane and 9.5-ft wide parking lane on each side with concrete curb and gutter. All water main, storm sewer, sanitary sewer, and associated laterals will be replaced. Improvements to the traffic signal hardware at Holmgren way are also anticipated.

3. Sidewalk Survey

Use the QR code or URL to access the Sidewalk Survey. Your participation is important as the project team will use survey responses to guide decisions about pedestrian accommodations.

4. TRAFFIC CONTROL AND STAGING

Morris Avenue will be closed to thru traffic while under construction. It is estimated that construction will take approximately six to eight months to complete. Construction is scheduled to begin in the spring of 2027.

5. PUBLIC COMMENTS

Please contribute any information or comments that you may have that will help in the development of the project. If you have any additional questions or need information in the future, please use the contact below:
